

European law on chemicals, REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals)

The products delivered by us to you are products which do not have registration obligation with REACH. Nevertheless we appreciate REACH for more safety for health and environment.

According to the regulations of REACH, we, as a manufacturer of products, are to be regarded as a “downstream user” and as such are also not be subject to registration. Chemical substances contained in our products, which may possibly be subject to registration, have to be registered exclusively by our pre-suppliers. Our self-adhesive laminates do not contain substances of ‘very high concern’ (SVHC) at a concentration level which would result in the need to register them on “preparations/articles” level. Annex XIV of the REACH regulation (EC 1907/2006) published on October 28, 2008 by the European Chemicals Agency (ECHA).

We can assure you that we, currently and in future, use only raw-, additive- and upgrading materials, which are legally on the market and which are accordingly registered subject to the regulations REACH.
